SUBJ: Approval of In Situ Chemical Oxidation Remedial Action Report
CTS of Asheville, Inc. Superfund Site
Asheville, Buncombe County, North Carolina

Dear Mr. Warren:

This letter is written to formally approve the In-Situ Chemical Oxidation (ISCO) Remedial Action Report that was submitted by Wood Environment & Infrastructure Solutions, Inc. on May 19, 2020. EPA appreciates your commitment in completing both the Electrical Resistance Heating (ERH) and ISCO treatment strategies at the CTS site. EPA understands that the first semi-annual ISCO performance monitoring event will occur later this month to evaluate progress towards meeting the established Remedial Action Objectives (RAO). EPA looks forward to declining TCE concentrations in the treatment area, as well as in the influent at the Eastern Springs Remediation System.

Please contact me at 404.273.7072 (EPA cell) or via email at Zeller.Craig@epa.gov if you have any questions regarding this matter.

Sincerely,

Craig Zeller

Craig Zeller, P.E.
